

A Gift of 5 Minutes Will Make a Huge Difference!

Will you take just 5 minutes to help 5 people get the medicine they need?

It's so easy. Just give out 5 FamilyWize Prescription Discount Cards (or more) to anyone you know, or meet. Ask them to pass it along if they don't need it.

It's shocking how many working people don't have insurance or have high deductibles that don't cover their medicine.

One out of four people have trouble paying for prescriptions. You never know who might need the help.

Give one to a neighbor. A co-worker. Someone standing in line at the pharmacy or supermarket. Your hair stylist. Your favorite waiter. The worker at the drive-thru. Your friend who's job hunting.

Your 5 Minute gift is an act of kindness that will be appreciated more than you know by someone who is in need of help. THANK YOU for taking the time to care!

Save \$20 per Prescription

- Average savings for someone using a FamilyWize card is almost \$20 per prescription. That's a 35% average savings! Greatest savings are on generic medicine.
- FamilyWize Cards can be used for all prescription medicine, at almost every pharmacy, including every chain.
- Everyone can use the FamilyWize card. Just give them a card to take to their pharmacy. They can use it immediately. And as often as needed.

Together we have helped over 2 million people save over \$260 million! Thanks to people just like you, who help give out FamilyWize cards.

If you have a few more minutes, please consider sending everyone you know a link to <http://uwelgin.org/advocate-health> so they can get a free card, or put the link on your Facebook and MySpace pages. You can even make and hand out photocopies of the card if you run out.
